Subject: Job Offer

StormS

I am writing to apply for the Unity developer Job found in LinkedIn. I am a junior developer with over 5 years of experience developing games in Unity for both mobile phones and desktops, I also have a huge passion for mobile games developement and learning new things about this complex game engine.

I am up to date with many programming languges such as Java, C#, C++ and Python and am also very efficient in terms of learning new concepts and skills. Even though I make erros often, I always attempt to learn from them in order to make up for the mistakes in later situations. I think my programming skills and my profesionalism would make me a well-suited candidate for this job.

I am looking forward to meeting with you in person soon enough to talk about the matter as I think it the best way to introduce myself and discuss about my qualifications in depth.

Sincerely,
Hugo Pelayo
